

# Loadhog Lid

The waste-free method of securing a pallet load without disposable packaging

A robust injection moulded plastic lid with tensionable straps that secures loads to wood/plastic pallets. Reusable daily for more than five years.

No one-trip packaging

Zero plastic waste

No packaging to dispose of

2 minutes labour saving per pallet

Up to 50% vehicle savings

Maximum stability

Lockable for security

Pallets secured immediately at end of line

Faster operations

No knives, banding or trip hazards

Waterproof

UK, Euro, Half Euro and US sizes

100% Recyclable

LoadhogLid

# LoadhogLid

## The Loadhog Lid is the multi-award winning way of eliminating the need for single use plastic packaging in your supply chain.

Once the load is built, the lid is positioned on top, the straps are drawn out of the lid and located under the pallet by robust hooks. The load is then secured in less than 17 seconds by tensioning simple in-built ratchet mechanisms.

This negates the need for any movement to a separate securing area, eliminates all disposable material costs and machinery to apply stretch wrap/banding and 2 minutes of labour every time the lid is used.

In transit, the lids allow secure double stacking, offer complete stability from pallet collapse and ensure tamper-proof delivery of goods.

On arrival, the lids can be removed with 'one click' – no waste to dispose of, no knives, no hassle. They can then be re-used or stacked for easy storage.

## Loadhog Ltd

Loadhog is a multi-award winning manufacturing company based in Sheffield, UK. An employee owned organisation, genuine innovation and new product development lies at the heart of our business.

Our aim is to solve every day problems within logistics and supply chain operations – reducing transport requirements, eliminating packaging waste and making life easier for those using our products.
