

Pally&Lid

The complete alternative to roll cages

The Pally & Lid system has a 500kg capacity and the same usable footprint as a roll cage (800x600mm). One foot press converts the Pally from a pallet to a wheeled dolly and back whilst the Lid clamps the load together.

42% greater trailer fill

80% space saving

4x less trailers to move empties

50% less trips to roll empties

60% lighter and easier to manoeuvre

Pallet stability on demand

No pump trucks/fork lifts

Automatable

No waste

Sealable and RFID enabled

PALLY

Pally is a patented combination of a pallet and wheeled dolly in one 800x600mm design.

One simple foot press on a pedal at either end of the unit will transfer up to 500kg load from pallet bearers to wheels or visa versa, making Pally immediately stable or mobile on demand without the need for other equipment like pump trucks/fork lifts.

When used in conjunction with the 'Half Euro' Loadhog Lid, the system is able to carry and secure all loads from cartons to tote boxes.

This light-weight solution offers an attractive alternative to both roll cages and pallets/stretch wrap – eliminating up to 42% of trailers, reducing equipment weight by 60%, freeing up to 80% of the space currently needed for storage and eliminating the need for one-trip securing materials.

Maximum stability and security

Instant mobility on demand

Significant cost savings

Easier, safer and quicker to use

Perfect for all retail, postal, logistics and industrial applications.

Loadhog Ltd

Loadhog is a multi-award winning manufacturing company based in Sheffield, UK. An employee owned organisation, genuine innovation and new product development lies at the heart of our business.

Our aim is to solve every day problems within logistics and supply chain operations – reducing transport requirements, eliminating packaging waste and making life easier for those using our products.
